

The need for utopias and dreams...

PRINTEMPS 2017

**The messy democracy
Peoples of the world, a society for everybody!**

For all women and men who...,
take actions every day, regardless the importance of these actions,
build our world,

Here we are! Spring has come! Our indignation is subjected to a tremendous ordeal, our rights are flouted, our bodies are bruised, but our minds will not be manipulated. Initiatives are already flourishing everywhere, the grande final will come soon.

Self-governance, democracy and horizontality are principles that enable us to get organised, respecting everyone's dignity and liberty, to make our fair actions live and to make our resistance grow even more. These principles also enable us to express our indignation, to struggle for our rights, to create our own alternatives and to strengthen even more our autonomy.

Every action methods are supplementary. The public space is our meeting crossroads, our sharing and transparency wealth.

Let's move on! We are strong, because both of our divergences and convergences.

We are supporting the "Our rights against their privileges" campaign
8th of march - International women's day
19th of march - Demonstration for justice and dignity
31st of march - 1st and 2nd of april Global public squares occupation
22nd of april - Our first social turn
23rd of april - Jour Debout

We call every human being, every collective, every association, every union to take this call over and to invade public squares, hands in the pocket, with all is heart and consciousness. WE are the alternative! We are all united! Let our humanity express itself, and let's continue to amplify it.

This text has been written thanks to the inspiration of women, of men and of children from
everywhere.
